

Inspection Hotline For TASB Risk Management Fund Members

For TASB Risk Management Fund members' convenience, Hartford Steam Boiler (HSB) has set up an Inspection Hotline to receive inspection requests. Requests for a jurisdictional boiler inspection, air tank inspection, certificate inspection, new installations and/or authorization of repairs, can be made through this single nationwide Inspection Hotline.

If your request involves more than five separate locations, please consider submitting a complete listing of locations and contacts by email.

Hartford Steam Boiler

Phone: 1.800.333.4677

Email: NSCInsp_Hotline@hsb.com

Hours: 8 a.m.–8 p.m. eastern time,
Monday through Friday

Periodic inspections of commercial boilers or pressure vessels are required by state regulation and play an integral part of proper maintenance for this equipment. Boiler certificates are issued by the Texas Department of Licensing and Regulation, and depending on the size and use of the boiler, the inspection frequency varies.

The Fund has created a partnership with HSB to assist with jurisdictional inspections. They have several inspectors in Texas that work with members to conduct certificate inspections and follow-up inspections when recommendations have been made.
